Lever House Primary School

Living things and their habitats - Hot animals	Main Subject: Science	Strand: Biology	Classes: Horse Chestnut, Elm and Cedar

What I should already know

- Some animals live outside.
- Some animals hibernate.

What I will be able to answer (Learning Questions):

- What is a desert habitat?
- Which animals live in a desert habitat?
- How do animals adapt to survive in the desert?
- Why can only some plants survive in the desert?
- Can desert animals survive in a colder habitat?

Sticky Knowledge:

A desert is a hot, dry habitat. Some deserts are sandy.

Camels, snakes, meerkats, geckos and scorpions live in the desert.

Camels store fat in their humps to use as food and can survive for 7 months without water.

Most plants need regular water to survive but cacti can store water for a long time to use when it needs it.

Key Vocabulary:

Cacti: more than one cactus.

Habitat: a natural home of an animal or plant.

Sand dunes: a mound of sand.

Store: to hold something.
